

ASSIGNMENT 13: Create a work mail for your organization.

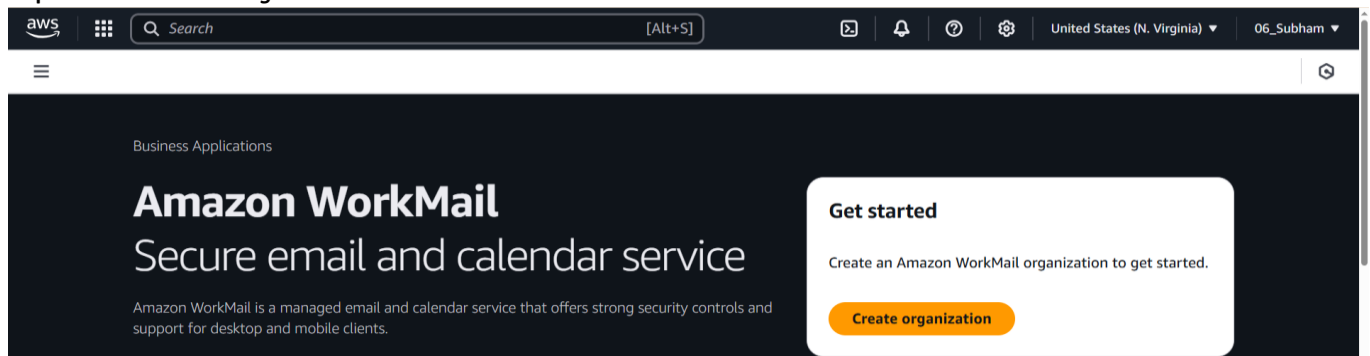

Step 1: Login to your AWS Account and Search for '**Amazon WorkMail**' and click on it.

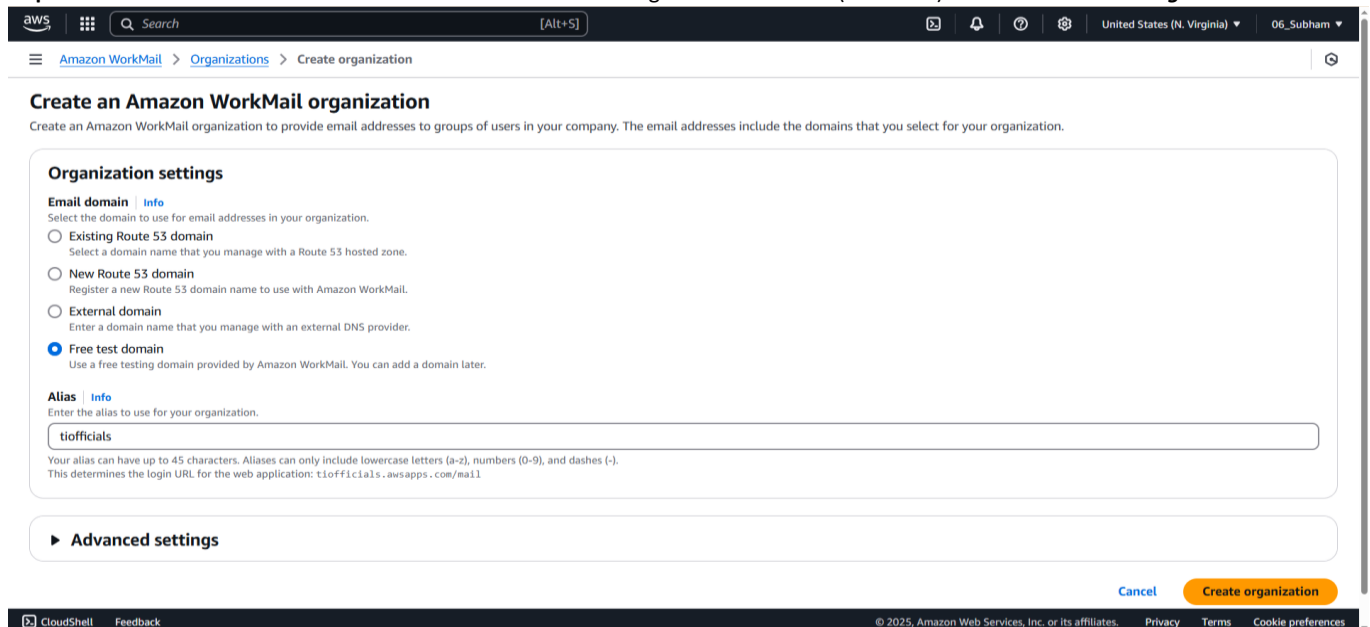

Step 2: As Asia Pacific (Mumbai) does not support Amazon WorkMail, Click on '**United States (N. Virginia)**'.

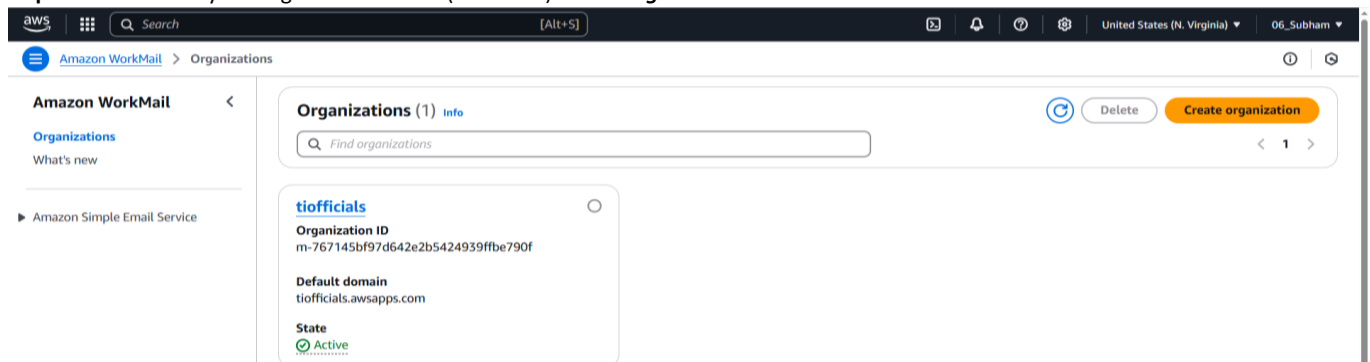

Step 3: Click on '**Create Organization**'.

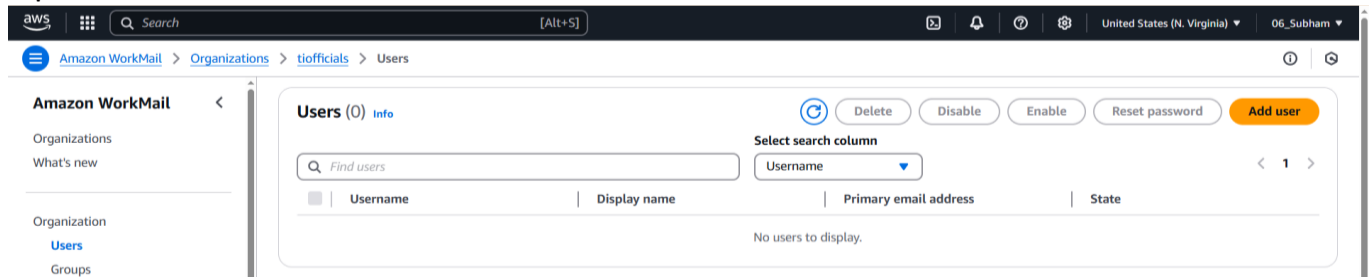

Step 4: Choose '**Free test domain**' from Email domain section and give an **Alias** name (**tiofficials**) and click on '**Create organization**'.

Step 5: Now click on your Organization name (**tiofficials**) under **Organizations**.

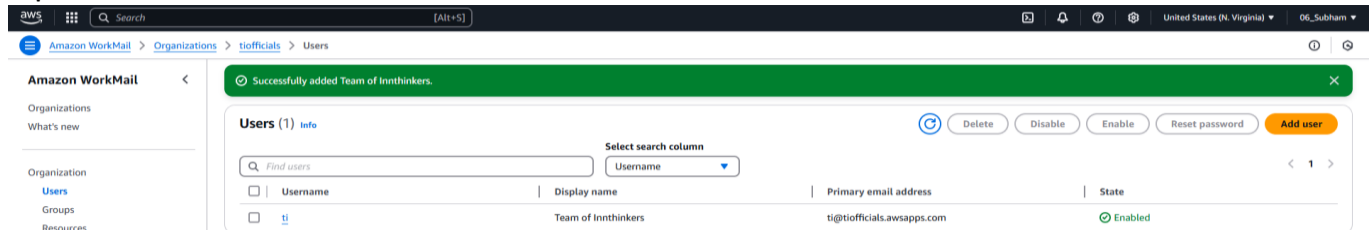

Step 6: Click on 'Users' and under that click on 'Add user'.

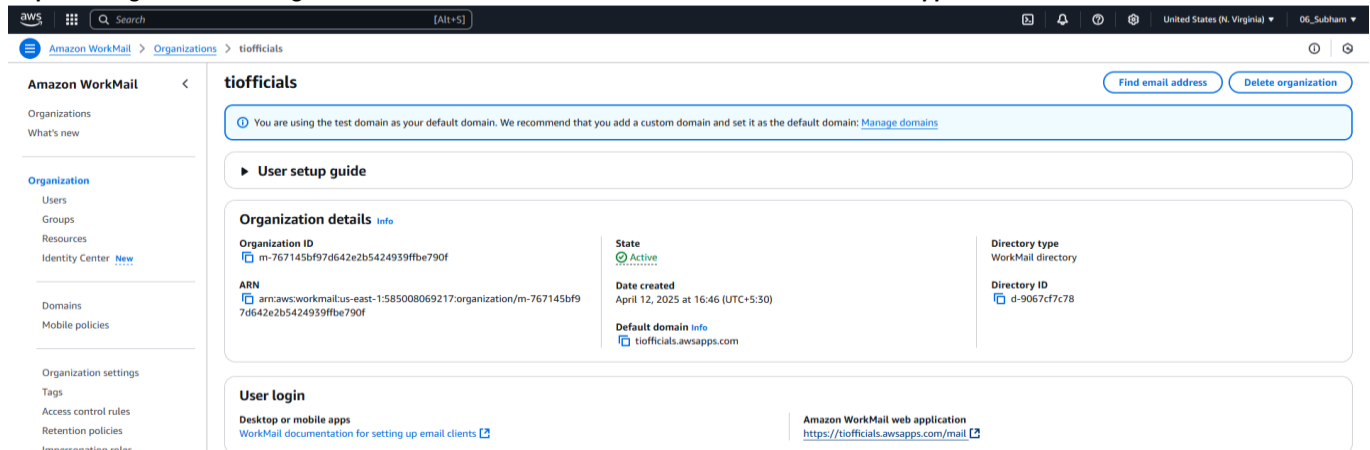

Step 7: Give the User Details and Password Setup as per your convenience and click 'Add user'.

Step 8: Check whether user is 'Enabled'.

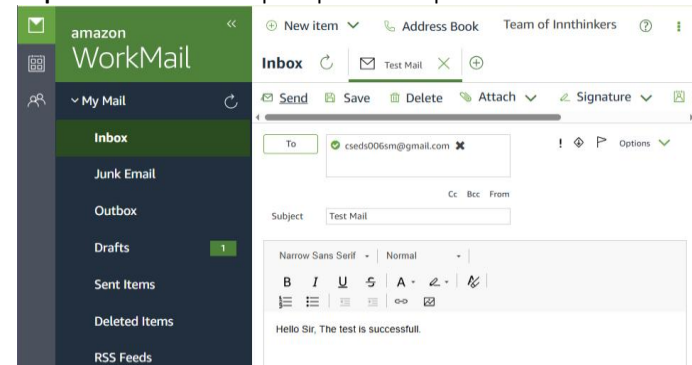

Step 9: Now goes the User Organization and Click on the URL of the 'Amazon WorkMail web application'.

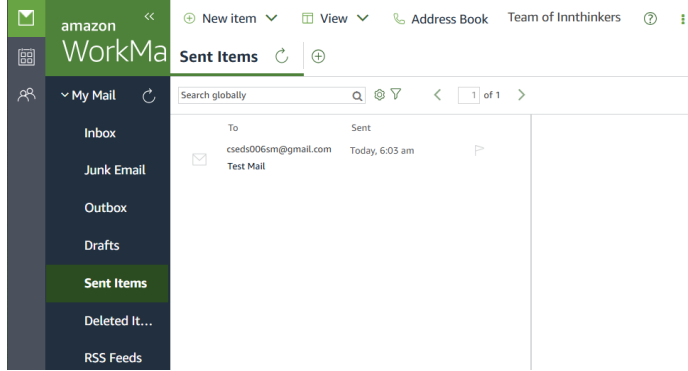

Step 10: Give the Username and Password.

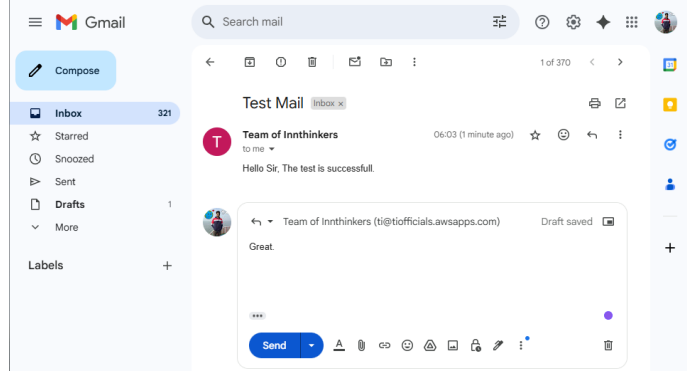

Step 11: Your WorkMail open up. Now compose a mail and send it.

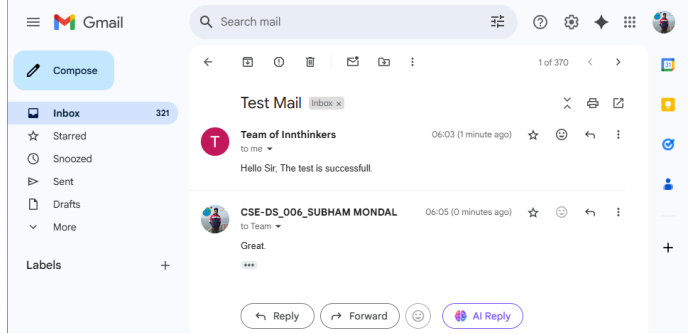

Step 12: Mail is successfully sent which is visible in the 'Sent Items'.

Step 13: The mail is received in the destination Email Address. Now give a reply to the received mail and send it.

Step 14: The mail is replied successfully.

Step 15: The Reply mail is received in your WorkMail which is visible in the 'Inbox'. Then click on the mail for see the details.
