

ASSIGNMENT 3: Create IAM User and give full access to S3.

Step 1: Click on IAM to create an IAM user.

Step 2: Go to Users under Access management.

Step 3: Click on Create User.

Step 4: Select **User name** and click on the check box. Click on **Custom password** and create your own password and press next.

The screenshot shows the AWS IAM console 'Create user' page, Step 1: Specify user details. The 'User name' field is filled with 'SG_IAM'. The 'Provide user access to the AWS Management Console - optional' checkbox is checked. Under 'Are you providing console access to a person?', the 'I want to create an IAM user' radio button is selected. Under 'Console password', the 'Custom password' radio button is selected, and a password field is visible with masked characters. The 'Next' button is highlighted in orange.

This screenshot is a closer view of the 'Specify user details' step. It shows the 'Custom password' section where a password has been entered and masked. Below the password field, there are instructions for password requirements: 'Must be at least 8 characters long' and 'Must include at least three of the following mix of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbols (! @ # \$ % ^ & * () _ + = - [] { })'. The 'Show password' checkbox is unchecked. The 'Users must create a new password at next sign-in - Recommended' checkbox is checked. The 'Next' button is highlighted in orange.

Step 5: Under the Set Permissions category, Click **Attach Policies Directly** and Click on **AmazonS3FullAccess** and then press next.

The screenshot shows the 'Set permissions' step of the 'Create user' process. Under 'Permissions options', the 'Attach policies directly' radio button is selected. In the 'Permissions policies (1/1328)' section, a search for 's3' has been performed, resulting in 16 matches. The 'AmazonS3FullAccess' policy is selected with a checkmark. The 'Next' button is highlighted in orange.

Policy name	Type	Attached entities
☐ AmazonDMSRedshiftS3Role	AWS managed	0
☒ AmazonS3FullAccess	AWS managed	0
☐ AmazonS3ObjectLambdaExecutionRolePolicy	AWS managed	0
☐ AmazonS3OutpostsFullAccess	AWS managed	0
☐ AmazonS3OutpostsReadOnlyAccess	AWS managed	0

Step 6: Click on Create User.

The screenshot shows the AWS IAM console 'Create user' page, specifically the 'Review and create' step. The left sidebar shows the progress: Step 1 (Specify user details), Step 2 (Set permissions), Step 3 (Review and create), and Step 4 (Retrieve password). The main content area is titled 'Review and create' and includes a sub-header 'Review your choices. After you create the user, you can view and download the autogenerated password, if enabled.'

User details

User name SG_IAM	Console password type Custom password	Require password reset Yes
---------------------	--	-------------------------------

Permissions summary

Name	Type	Used as
AmazonS3FullAccess	AWS managed	Permissions policy
IAMUserChangePassword	AWS managed	Permissions policy

Tags - optional

Tags are key-value pairs you can add to AWS resources to help identify, organize, or search for resources. Choose any tags you want to associate with this user.

No tags associated with the resource.

[Add new tag](#)

You can add up to 50 more tags.

Buttons at the bottom: [Cancel](#), [Previous](#), [Create user](#).

Step 7: User is created successfully and download the csv file.

The screenshot shows the AWS IAM console 'Retrieve password' page. A green banner at the top states 'User created successfully' and 'You can view and download the user's password and email instructions for signing in to the AWS Management Console.' with a [View user](#) button.

The left sidebar shows the progress: Step 1 (Specify user details), Step 2 (Set permissions), Step 3 (Review and create), and Step 4 (Retrieve password).

Retrieve password

You can view and download the user's password below or email users instructions for signing in to the AWS Management Console. This is the only time you can view and download this password.
